### **DETAILED ACTION**

This Office Action is in response to Election/Restriction filed on June 13, 2006.

Applicants elected Group I, consisting of claims 1-8, 16-20, for prosecution without traverse. However, Examiner should have separated these claims into different groups. Examiner takes this opportunity to correct her position by separating claims 1-8 and 16-20 into two separate groups. Claims 1-8, 16-20 are presented for Election/Restriction.

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121.

I. Claims 1-8, drawn to a network for the interconnection of computers comprising a client computer, a server computer configured to store datafiles, an interpreter in server, a logical or physical system, a gateway installed at the server and integrated in interpreter classified in class 709, subclasses 203, 219.

II. Claims 16-20, drawn to a method for operating a network for the interconnection of computers having a server and client comprising storing datafiles by server, calling datafiles by client, transmitting datafiles by server, inquiring by client for a specific service, determining by queried server whether it can perform requested service, if can perform service it performs, if can not perform service, switching client to server that can execute service, classified in class 718, subclasses 102.

Art Unit: 2157

2. The inventions are distinct, each from one another because of the following reasons: Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3<sup>rd</sup> paragraph), and the species are patentably distinct (MPEP § 806.04(h)). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.

Art Unit: 2157

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
